Making the Connection for Action

Engaging Girls in STEM is an event that will encourage and inspire girls and young women to explore Science, Technology, Engineering, and Math (STEM) professions. The evening includes an interactive panel of female STEM professionals and a share fair with over 20 individuals and organizations who will showcase their various STEM programs and industries.

San Joaquin County Office of Education (SJCOE) is honored to be one of the 3 California sites selected for this impactful STEM event. A big thank you to the California Department of Education and the California Commission for the Status of Women and Girls for making this opportunity possible.
