Integrated and Designated ELD: Elementary Teacher as a Language Coach

**October 12, 2022
3:15 - 5:15 P.M.**

How can teachers easily and effectively build language proficiency for their EL/DLL students throughout their daily lessons? This two-hour interactive webinar, including one hour of pre-session asynchronous work, provides teachers with a construct and set of practices that can be quickly integrated into existing lessons and practices, including designated ELD. Aligned to Principle #2 of the English Learner Roadmap policy, participants will learn to effectively identify and address the strengths and needs of English learners by providing targeted scaffolds and supports to actively deepen students' use of sophisticated academic language for speaking and writing, tapping into their linguistic genius. Teachers will be prepared with tools and resources that can be implemented the next day in their virtual and in-person classrooms. Our students' brilliance shines through when we create the conditions for educational equity and access.

Audience: Classroom teachers, Site/local teams of educators, TOSA, Instructional coaches, and COE Staff
